PREFATORY.

In preparing this Catalogue it has been our endeavor to present in a new form a convenient hand-book which may be of service to our customers in selecting books for purchase. It embraces two thousand three hundred of the principal American and British books on Medical and allied topics, which, with the kind assistance of Dr. Thomas C. Minor, of this city, have been classified under three hundred and eighty separate heads, with numerous cross references. In this division we have given the title, we think with sufficient fullness, the size, place of publication, date of the last edition, and price of each work. In the second division are given the same books with short titles, arranged by the author's names, with the pages on which the full titles may be found. Thus, the physician or student can find, without difficulty, what books there are on any special subject, and also the writings of any particular author.

It has been our aim to make this a catalogue only of such works as are in print and readily obtainable. Some books may be included in it, however, which are out of print, from the fact that some publishers have the habit of keeping the titles of their publications on their catalogues after their stock of them has been exhausted. In cases where there is a probability of such books being reprinted, we have inserted the old title, leaving the price blank.

The American publications are fully represented in our stock, and can be promptly supplied. All new books are received as soon as issued.

The British publications are not all kept in stock, but we are ordering weekly, and can supply any work in print in about seven weeks from the date of the order. We have experienced agents in London and Paris, who give special attention to the collection of old, rare works, and such modern works as are out of print and scarce.

Physicians and Librarians desirous of keeping up their Serials, will do well to furnish us with a list of them, so that the new volumes may be sent to them promptly on publication without further orders.

It is our intention to issue, from time to time, supplements of new books and lists of second-hand books, which will be sent free to all who desire them and will send us their address.

Those who favor us with their patronage may rely in having their orders carefully filled on the most liberal terms. Letters of inquiry will meet with prompt attention.

ROBERT CLARKE & CO.

Cincinnati, AUGUST, 1878.

SIXTH EDITION.

This catalogue records the titles, prices, etc., of about twenty-nine hundred books. The additions to this date will be found on pages 171-211. The plates of the old catalogue, pages 1-170, have been altered so as to show the latest editions and changes of prices, etc.

The index by authors, shows the page on which the full title of each book can be found.

- ALLEN (H.) *A System of Human Anatomy, including its Medical and Surgical Relations. With an Introductory Chapter on Histology*, by E. O. Shakespeare. Numerous lithographic plates and wood-cuts. 4to. Philadelphia. Nos. 1 to 6 ready. Each, 3 50
- ANATOMICAL REMEMBRANCER; or, Complete Pocket Anatomist, containing a concise Description of the Bones, Ligaments, Muscles, and Viscera; the distribution of the Nerves, Blood-vessels, and Absorbents; the arrangement of the several Faciæ; the Organs of Generation in the Male and Female, and the Organs of the Senses. 24mo. New York, 1877. 1 00
- BELLAMY (E.) *Text-book of 113 Anatomical Plates*. 8vo. London, 1873. Plain, \$8.40; colored, 16 80
- BOCK (C. E.) *Atlas of Human Anatomy*. 38 colored plates, containing 273 figures, with descriptive letter-press. Imperial 4to. New York, 1878. 15 00
- BOCK-STEGER'S ANATOMICAL MODELS OF THE HUMAN BODY. With Explanations in English or German.

I. Preparations Represented in an Enlarged Size.

1. THE HEART, the anterior wall of which can be removed, disclosing the four cavities of the heart, with their openings and valves. \$8 00
2. THE EYEBALL, the upper portion of which (containing a microscopical representation of the layers of the retina) is to be taken off, when the cornea and iris, the lens and the vitreous body may be taken out. 6 50
3. THE ORGAN OF HEARING, containing in separate parts the membrana tympani, the ossicles of the tympanum, the labyrinth, and the half-opened cochlea. 8 00
4. THE SKIN, showing, in a transverse section, the organs of perspiration, a hair with its follicles, the pulp, the sebaceous glands, and tactile corpuscles. 4 00
5. THE TEETH, the anterior portion of the left maxillary bone being removed, for the purpose of showing their development and structure. 4 00

II. Preparations of Natural Size.

6. THE BRAIN, in four different aspects: *A. View of Upper Portion*, \$3.50.—*B. View of Lower Portion* (basis of cerebral nerves), \$3.50.—*C. Perpendicular Section* along the median line, \$3.50.—*D. Transverse Section*, showing the cavities, \$3.50.
7. THE HEAD. Three views: *A. Head with Muscles, Nerves, and Blood Vessels* of one side, \$6.00.—*B. Head with Cavities of the Skull and Eye, Upper and Lower Jaw*, \$6.00.—*C. Perpendicular Section* of the head, showing the brain, cavities of the mouth and nose, larynx and pharynx divided along the median line, \$6.00.
8. THE LUNGS, with the heart. *A. Anterior view* of the lungs and heart. The pericardium opened, the anterior portion of the left lung is removed, showing the *Bronchial Ramifications*, \$4.00.—*B. Posterior view* of the lungs and heart, with a representation of the bronchial rami, air cells, and blood vessels, \$4.00.
9. THE ORGANS OF RESPIRATION. *Air-passages, Lungs, Heart*. The anterior part of both lungs with the heart can be taken off, laying open the ramifications of the wind-pipe within the lungs. The connection of the pulmonary blood vessels with the heart, \$12.00.
10. THE LARYNX (viewed anteriorly and posteriorly): *A. Anterior aspect* with the hyoidean os and the thyroid gland, \$2.50.—*B. Posterior aspect* with the glottis and vocal cords, \$2.50.—*C. Larynx* in connection with the *Tongue and Pharynx*, which latter is opened from behind, \$3.50.
11. THE JOINTS, partially opened, with their bones and ligaments: *A. Arm-joint* of the shoulder, opened, \$2.50.—*B. Elbow-joint*, *a. anterior view*, \$2.00.—*C. Elbow-joint*, *b. lateral view*, \$2.00.—*D. Wrist-joints and Hand*, \$3.00.—*E. Hip-joint*, \$2.50.—*F. Knee-joint*, \$2.50.—*G. Ankle-joints and Foot*, \$4.00.

Anatomy, Human—Continued.

Bock-Steger's Models—Continued.

12. THE TRUNK (Torso) with the viscera of chest and abdomen laid open, \$30.00.
13. THE HUMAN SKULL AND BRAINS, the various parts of which can be taken out, \$12.00.
14. THE LARYNX PHANTOM. Mask of the face, mouth open, for the purpose of practicing with the laryngoscope, \$10.00.

A complete set of 28 models, packing included, \$150.00.

For single models, packing-boxes charged at cost.

BOURGERY & JACOB'S ANATOMICAL PLATES. Twenty in set. Figure, three feet long, beautifully colored; mounted on rollers. Price per set, \$50.00. Each plate, separately, 3 00

OSTEOLOGY AND SYNDESMOLOGY.—Plate I. Anterior plane. *Right Side*: The Dry Bones. *Left Side*: The bones clothed with their ligaments. Plate II. Posterior plane. The same arrangement.

MYOLOGY AND APONEUROLOGY.—Plate III. Anterior plane. *Right Side*: Superficial Muscles. *Left Side*: Superficial Aponeuroses. Plate IV. Anterior plane. *Right Side*: Muscles of the second layer. *Left Side*: Muscles of the third layer. Plate V. Posterior plane. *Right Side*: Superficial muscles. *Left Side*: Superficial aponeuroses. Plate VI. Posterior plane. Second and third layer of muscles. Plate VII. Lateral plane. Superficial and deep muscles. Muscles of the os hyoides. Plate VIII. Diaphragm. Interior of the trunk, muscles of the lower jaw, of the tongue, velum palati, and of the pharynx.

ANGIOLOGY.—Heart, lungs, arteries, veins, and lymphatics. On the different figures are indicated the points at which compression on the ligature of the vessels is effected, and in regard to the veins in particular, the proper points for performing venesection. Plate IX. Interior of the trunk. Heart, lungs, and their envelopes. Large vessels. Plate X. Vessels of the thorax and abdomen, azygos vessels, cerebral and spinal venous sinuses. Plate XI. Anterior plane. Subcutaneous vein, and deep vessels. Plate XII. Posterior plane. Superficial veins, and deep vessels. Plate XIII. Lateral plane. Partial figures, internal maxillary and internal carotid vessels, etc. Plate XIV. Lymphatic vessels.

NEUROLOGY.—Plate XV. Anterior plane. Encephalic nerves. Nerves of the extremities. Plate XVI. Posterior plane. Studies of the ganglions and their nerves. Studies of the fifth and seventh cerebral pairs. Plate XVII. Brain spinal marrow, and envelopes. Organs of the senses. Larynx.

DIGESTIVE APPARATUS.—Plate XVIII. Alimentary canal, stomach, intestines, chyliferous vessels, peritonæum. Plate XIX. Stomach, liver, pancreas, spleen, kidneys, supra-renal capsules, bladder. Abdominal venous system. Great Sympathetic and pneumogastric nerves. Plate XX. Complete study of the perinæum in both sexes. Male and female organs of reproduction. Embryotomy.

BRAUNE (W.) Atlas of Topographical Anatomy after Plane Sections of Frozen Bodies. Containing 35 full-page photographic plates, with 46 wood-cuts in the text. Translated by E. Bellamy. 4to. Philadelphia, 1877. Cloth, \$8.00; half morocco, 10 00

ROBERT CLARKE & CO'S

(CINCINNATI, OHIO,)

List of Medical Blanks.

THE POCKET CASE-RECORD AND PRESCRIPTION BLANK BOOK, WITH VISITING LIST. $3\frac{1}{2} \times 7\frac{1}{2}$ in. pp. 176. Flexible cloth. Weight 4 ounces. 35 cents each; \$3.50 per dozen.

Every physician feels the need of keeping notes of his case and a copy of prescriptions, to which he may turn at any time for refreshing his memory as to symptoms and treatment—and sometimes it is important in legal investigation. This book supplies this want in a way unequaled by any thing that has been produced—combining these records with a VISITING LIST, which meets the demand of the largest practice. In addition, there is a list of poisons and antidotes, a dose list of poisonous drugs, a table for obstetric calculation, etc.

The records contain spaces for noting date of visit, name, address, age, physique, diagnosis, pulse, temperature, respiration, tongue, urine, and stools, for recording prescription, and a full-sized blank for the apothecary.

Send 35 cents for sample.

APOTHECARIES

Who supply physicians with prescription blanks should not fail to procure these as they are the *cheapest in the market*; being almost invariably used and not thrown aside. They are sold with the apothecaries' name *on the back* of each prescription blank, at the following:

PRICES—12 books, \$5.00; 25 books, \$9.00; 50 books, \$16.50; 100 books, \$30.00. For physician's name *in addition* to apothecaries' card, \$1.50 for each name.

ALL ORDERS SHOULD BE ACCOMPANIED BY A REMITTANCE EITHER BY POSTAL ORDER, DRAFT, OR REGISTERED LETTER.

Packages for apothecaries will, as a rule, be sent by express unless otherwise ordered, and *C. O. D. if not paid for*. Orders for 12 copies sent by mail *only when paid for in advance*, and 25 cents extra to prepay postage.

OFFICE CASE-RECORD AND PRESCRIPTION BLANK BOOK. 8 × 11 in. pp. 250. Half Sheep. \$1.50.

This book will be found almost indispensable to those who do a large office business. It is so arranged that one may keep complete notes on the condition of each patient as to pulse, temperature, respiration, tongue, urine, stools, age, weight, and physique, together with a copy of the prescription. There is also a **R** blank for the apothecary, which is torn off through a perforated margin. There are nearly 400 prescription blanks in each book.

PHYSICIAN'S GENERAL LEDGER. Half Russia. Cloth sides. \$4.00. By mail, prepaid, \$4.60.

A Printed and Ruled Blank Ledger for 480 Accounts; with columns for the charge, stating the name of the patient, the disease, the time from which and to which the patient is treated, the number of visits at the residence or consultations at the office, and the aggregate amount; with columns for dates and amounts of credits, so that the state of the account can be seen at a glance. It has also a full Alphabetical Index. It may be used with any Visiting List, and is the simplest and most convenient Ledger in the market.

MEDICAL CHART OF TEMPERATURE, PULSE, RESPIRATION, AND REGIONS. 50 cents per 24 blanks; \$3.00 per 200 blanks. Special rates for large quantities, also the same bound in book form, containing 300 pages and index. Price \$4.00.

The Chart is cap size, two forms to a sheet, printed on one side with headings for name, disease, age, sex, weight, race, occupation, married or not, physique, residence, present and former, family history, and space for a full history and diary of the case. For each case there is also a chart, intersected by alternate red and blue lines for projecting a graphic view of the temperature and pulse range,

morning and evening, nearer perfect than any heretofore designed. In addition, there are spaces for noting respiration morning and evening, and a series of four outline figures of the body, presenting anterior, posterior, and lateral views, and divided into appropriate regions, with normal positions of pelvic viscera, so that any one may easily map out the location of lesions of the lungs and liver, abdominal tumors, malpositions of the uterus, etc. They are intended to be left at the patient's bedside and filled up at the time of the visit, or in *hospitals*, placed at the head of the patient's bed so that *they may easily be filled by the house physician*. They are arranged so that after use they can be bound in series—all the pneumonia, typhoid fevers, etc., separately.

DRUGGISTS' RECORD OF POISONS. Post paid \$1.50.

To meet the requirements of the recent law (*see below*) we have prepared a Record Book with convenient rulings and Printed Headings, in which to register Sales of Substances usually known as poisons; also, a List of Poisons and their Antidotes, etc. It contains over *two hundred pages*, is neatly printed on good paper and substantially bound in cloth with leather back. *Size*, 10 inches by 8 inches.

It is ruled and printed for recording the Date; Time; Quantity; Name of Poison; Purchaser's Name; For what purpose Required; For whom Intended; Residence.

Every druggist must keep a record of this kind. Its use is likely to lesson the number of deaths from carelessness; to lead in various ways to a more thorough knowledge of the subject of Poisons; while in case of death by poisoning it becomes a valuable proof that the law regulating the sale of poisons has been complied with.

Sent to any address, postage prepared, on receipt of \$1.50.

QUESTIONS OF EXAMINATION. Questions submitted to the Graduating Classes of the Medical Colleges of Ohio. From 1871 to the Present Time. 8vo. Pamphlet. 50 pages. Price 50 cents.

CONSULTATION CHART

OF THE

EYESYMP TOMS AND EYE-COMPLICATIONS

OF

GENERAL DISEASES,

ARRANGED BY
HENRY G. CORNWELL, M. D.

Professor of Ophthalmology and Otiology, Starling Medical College, Columbus, Ohio.

Price, mounted on Rollers, size, 14 x 20, 50 cents. Sent by mail, prepaid, on receipt of price.

[AUTHOR'S NOTE.—“In the preparation of this chart the general arrangement of Förster (*Beziehungen der Allgemein-Leiden und Organ-Erkrankungen zu Veränderungen und Krankheiten des Sehorgans*, Leipsic, 1877) has been adopted, but the matter has been chiefly obtained from an investigation of these points in the works of the best ophthalmological and neurological authorities, with the view of making it as complete an office chart as possible.”]

It is designed to serve as an office-reference chart, to enable the physician engaged in general practice to determine the significance of the eye-symptoms and eye-complications of those diseases which he daily observes at the bedside of his patients.

The condition of the pupils, eye-lids, the movements of the eye-balls, and all the other conditions affecting the globes and lids are noted. The diseases are arranged under ten heads, as follows:

I. ORGANS OF RESPIRATION AND CIRCULATION.—Under this head all the affections of the eye which occur in Whooping Cough, Emphysema, Pulmonary Tuberculosis, Pneumonia, Pleuro-Pneumonia, Aneurisms of Carotid, Innominata and Aorta, Vascular Diseases of Heart, Endocarditis and Carotid Aneurisms, Exhaustive Hemorrhages, etc., are recorded.

II. DIGESTIVE ORGANS.—Icterus, Teeth, Hypertrophy Cirrhosis and Chronic Diseases of Liver, Cholera Infantum, etc.

III. URINARY ORGANS.—Bright's Disease, Uremia of Pregnancy and Scarlet Fever, Diabetes, etc.

IV. SEXUAL ORGANS.—Female Sexual Diseases, Pelvic Cellulitis, Uterine Displacements, Anomalies of Menstruation, Metritis, Endo-Metritis, Cervicitis, and Tumors, Climacteric Period, Puerperal Disease, etc.

V. NERVOUS SYSTEM.—Cerebral Congestion, Apoplexy, Meningitis and Cerebro-Spinal Men., Purulent Men., Basilar Tubercular Men., Chronic Basilar Men., Hydrocephalous, Serous Effusion into Brain, Anæmia of Brain, Concussion of Brain, General Cerebritis, Brain Tumors, Disease of Cerebellum, Epilepsy, Hysteria, Chorea, Catalepsy, Convulsions of Childhood, Cerebral Sclerosis, General Cerebral Paralysis, Insanity (the pupillary changes observed in over two hundred and fifty cases of the different forms of insanity, examined by the author at the Athens Ohio, Asylum, is included), Tabes, Tetanus, Irritation of Cervical Sympathetic from Abscesses, Tumors, etc., Lesion of Tubercula Quadrigemini, Basedow's Disease, etc.

VI. SKIN.

VII. RHEUMATISM, SCROFULA, AND SCURVY.

VIII. ACUTE AND CHRONIC INFECTIOUS DISEASES.—Measles, Scarlatina, Variola, Typhoid Fever, Diphtheria, Cholera, Syphilis, etc.

IX. POISONS.—Opium, Alcohol, Tobacco, Anæsthetics, Lead Poisonings, Belladonna, Hyoscyamus, Stramonium, Quinine, Chloral, Bromism and Iodism, Ergot, Arsenic, Nitrate of Silver, etc.

X. HEAT AND COLD.

THE HISTORY OF TUBERCULOSIS

FROM THE TIME OF SYLVIUS TO THE PRESENT DAY:

Being in part a translation, with notes and additions, from the German of Dr. Arnold Spina, First Assistant in the Laboratory of Professor Stricker, Vienna; containing also an account of the Researches and Discoveries of Dr. Robert Koch and other recent Investigators.

BY ERIC E. SATTLER, M. D.

1 Volume. 12mo. \$1.25.

The experiments of Dr. Robert Koch, which resulted in his discovery of the *bacillus tuberculosis*, and which raised him from an obscure physician in a country town to the head of the Imperial German Health Bureau, have attracted unusual attention among the profession, and induced immediate and special inquiry into the history of Tuberculosis, so necessary for an intelligent understanding of the subject. Unfortunately the material for such a history is widely scattered in the technical literature of the last two centuries, and in numberless volumes of transactions of societies and periodicals, a majority of which are difficult of access even in the largest medical libraries.

In preparing this volume, to supply in a measure this want, the aim has been to trace the whole history of opinion from Sylvius to the present time, and to furnish a condensed but exhaustive review of the most important contributions to the literature of the subject. These include—

Chapter 1. The Pathological Anatomy and Histology.

Chapter 2. Inoculation Experiments.

Chapter 3. Inhalation Experiments.

Chapter 4. Feeding Experiments.

Chapter 5. Inoculation and Inhalation Experiments with Tubercle Virus.

[Over.]

Chapter 6. An account of Dr. Koch's Experiments and the Discovery of the Tubercle Bacillus.

Chapter 7. An Account of all subsequent Experiments and Criticism.

The first five chapters of this work are a free translation, with a few notes and additions, of the first part of the very valuable work of Dr. Arnold Spina, titled "Studien über Tuberculose," which has just appeared in Germany. Dr. Spina is a most formidable critic and opponent of the theories of Koch.

The sixth and seventh chapters are new. Spina brought his history down only to the time just preceeding Koch's experiments. These two chapters contain an account of the investigations of Koch and of the various subsequent experiments of other investigators, and their attempts to verify or to overthrow his conclusions. They include a full description of the latest experiments of Dr. Spina, in which he claims to have disproved Koch's theories. A sketch of Koch's reply to Spina is given also. These additions bring the history of Tuberculosis down to March, 1883.

EXTRACTS FROM REVIEWS.

"Dr. Sattler has performed a very praiseworthy work in thus presenting to the English reading part of the profession so elegant a translation of Spina's latest work. He has given us, in a clear and unbiased manner, the researches of Koch and others, together with the investigations of Spina, which are thought to refute the theory of the germ origin of phthisis. . . . No other work with which we are acquainted will give the reader so good a knowledge of the history of phthisis, and the present status of our knowledge regarding its etiology, as the one under review."—*Cincinnati Lancet and Clinic*.

"It is one of the most concise *résumés* of what has been said concerning the pathological anatomy and histology of tuberculosis."—*New York Medical Record*.

"It is a timely contribution to the subject of tuberculosis, especially in the light of the recent investigations and heated controversies. We commend this volume to those who are desirous of bringing their knowledge of the very voluminous subject of tuberculosis up to its latest development."—*North Carolina Medical Journal*.

The work will be sent by mail, prepaid, on receipt of the price.

THE BLACK ARTS IN MEDICINE.

With an Anniversary Address, by the late JOHN D. JACKSON, M.D., of Kentucky. Edited by L. S. McMURTRY, M.D. 12mo. Cloth. 1.00.

Unhappily there is too much truth conveyed by this satire, which *veluti in speculum*, reflects back the habits of very many of our otherwise respectable men. If the public could have as keen an appreciation of the contemptible littleness of these practices as evidenced by the author of this work, the *black arts* would soon become the *lost arts* of medicine.—*N. Y. Medical Journal*.

This is one of the most amusing, most entertaining, most sarcastic, and most useful monographs that have been received for many months. If one will study this work, and, avoiding all the arts so well satirized, pursue the course tacitly or constructively indicated, he will become a wiser, purer, and better man, a more efficient, trustworthy, and accomplished physician. This is exalted commendation, for so small a publication, but the praise bestowed is well and fully deserved.—*Richmond and Louisville Medical Journal*.
